Job Experience

Veriforce

Senior Frontend Developer

July 2017 - Present

Playing a pivotal role in the process of architecting applications in React, Redux, TypeScript, and Material-UI.

Set up a monorepo for over a dozen React applications and several private NPM packages using Lerna and Jenkins.

Manage dependency upgrades and implementations of new libraries.

Created the first private NPM package and build processes in the organization to share code between React/legacy applications.

Implemented TypeScript into existing React applications.

Netchex

Software Developer

November 2014 – July 2017

Worked in a agile scrum environment doing full stack development on an application that specialized in payroll, benefits, and human resources.

Developed back-end code base using domain driven design with C#, Web API, and MVC5.

Developed frontend single page applications using AngularJS, TypeScript, Bootstrap, and LESS.

Edison Chouest Offshore

PLC Programmer

December 2013 – November 2014

Implemented automation systems on new vessels using ladder logic.

SCPDC

Software Developer Intern

February 2013 - November 2013

Developed client sites using WordPress, Bootstrap, PHP, and jQuery.

Skills

| React | Redux | TypeScript | Material-UI | Node JS | Webpack | NPM | Git |

Education

Nicholls State University

Bachelor of Science (B.S.)

August 2009 - December 2013

Majored in Computer Information Systems

GPA: 3.6

Awards

Consistently been awarded the President's List award since the Fall 2010 semester. The President's List award requires a student to maintain a scholastic GPA of 3.5 or higher.

Organizations

Member of Beta Gamma Sigma. It is the highest recognition a business student anywhere in the world can receive in a business program accredited by AACSB International.

Member of Upsilon Pi Epsilon. It is the first and only existing international honor society in the Computing and Information disciplines.
